

# Custom Manufacture Cell Culture Media

**Are you looking for a custom formulation to optimise your cell culture manufacturing process or to test a research hypothesis?**

In addition to manufacturing standard media formulations, Life Science Production (LSP) can manufacture bespoke formulations to your exact specifications.

LSP will work closely with you to deliver your custom media and assist in media optimisation. With a minimum batch size of just 10 L and a short lead time (dependent on reagent availability), you have the opportunity to assess efficacy before committing to a larger volume.

LSP have over 30 years of media manufacturing experience and we pride ourselves on our Company values of Quality, Traceability and Integrity

- LSP operate two Class 5 ISO 13408-7:2012 cleanrooms
- ISO 9001 and ISO 13485 accreditation
- We manufacture using fully disposable, single-use systems
- Flexible packaging in bottles or industrial single-use (bulk) bags
- Custom labelling
- Batch sizes range from 10-1,000 litres
- All operations are carried out in our UK facilities
- We can manufacture to Standard Operating Procedures or to customer determined procedures, depending on your requirements
