ABclonal Technology®

Ensuring Data Reliability with Global Standards & Validation Frameworks

Traceability to International Standards - NIBSC

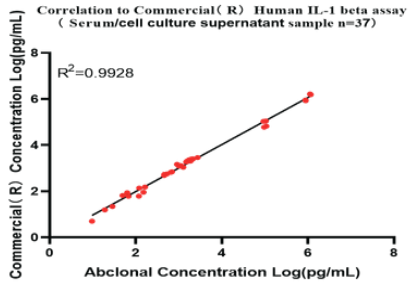

NIBSC

Developed Following ICH M10 Guidelines

ICH harmonisation for better health

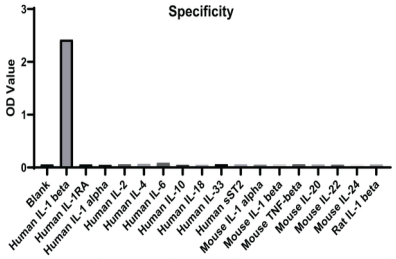

Comprehensive Performance Validation

Comparable Performance

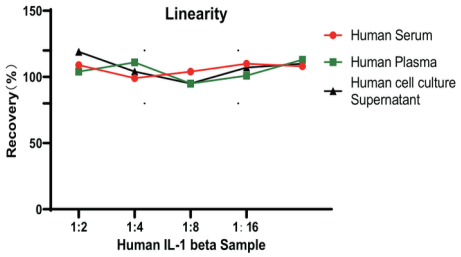

High correlation with R&D Systems (R > 0.99)

High Specificity

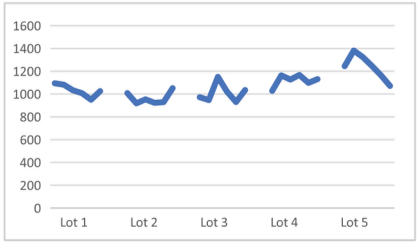

Validated target specificity with excellent assay specificity

Excellent Dilution Linearity

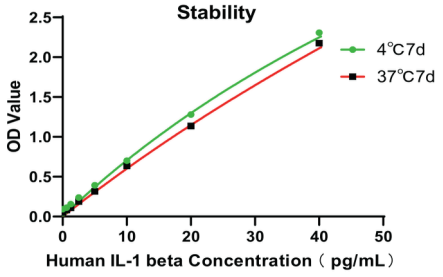

Excellent sample dilution linearity, supporting diluted sample analysis

Lot-to-Lot Consistency

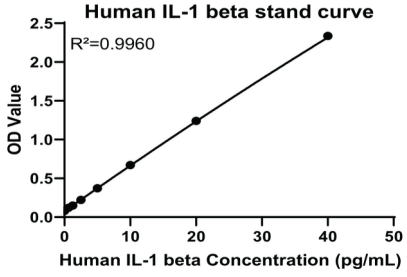

Multiple lots validated with CV < 15%

Excellent stability

Stable for 1 week at 37°C and 1 year at 4°C

Stable Performance

Standard curve fitting: R² > 0.99
